More market offenders settled with Sebi last year, as tighter enforcement resulted in nearly three applications a day

AGENCY

NEW DELHI: Capital market offenders rushed to bury the hatchet and settle charges last year, data from Sebi's annual report revealed, with offenders opting to buy peace with the regulator by paying settlement charges rather than contest the matter at judicial forums. Sebi's annual report for FY25 showed that the number of settlement applications nearly doubled last year, with the settlement amount up nearly eight times compared to a year ago. The trend amounts to nearly three settlement applications each working day received by Sebi last year. The annual report published by Sebi showed that during FY25, Sebi received 703 applications for settlement, compared to 403 such applications in FY24. The total amount received by Sebi as settlement charges rose from Rs 94.5 crore in FY24 to Rs 799 crore in FY25. This number is expected to rise as a major settlement case like the one involving NSE

are pending. The exchange has approached Sebi to settle legacy issues of co-location and the dark fibre case, offering nearly Rs 1,400 crore as charges. NSE has also paid Rs 40.35 crore in June this year for violations found during Sebi's inspection for the period between February 2021 and March 2022. A top regulatory official told Moneycontrol on condition of anonymity that this rush for settlement is due to strong enforcement by the regulator. "With the existing tools and quality of enforcement the level of evidence and investigation has gone up, the evidences are strong and upfront, so

disclosure regulations, FPI Regulations, Mutual Fund regulations etc. For 284 applications settled during FY25, Rs 799 crore were collected as settlement charges, and another Rs 65 crore or so were collected as disgorgement charges. Regulator's Sumit Agrawal said the lack of statutory timelines for Sebi investigations and orders can prolong proceedings indefinitely, creating commercial uncertainty. "Orders frequently rest on circumstantial evidence, where the burden of proof effectively tilts the scales against the violator. With no statutory timelines for issuing confirmatory orders, completing investigations, or delivering final orders, proceedings can linger indefinitely, imposing commercial uncertainty that most businesses cannot afford," Agrawal added. Legal experts also point towards the need to overhaul the settlement system, stating that it is bogged down by opaque decision-making and mathematical formulae that are complex and arbitrary.

NO CUT, ONE CUT, OR TWO? ECONOMISTS SPLIT ON RBI MPC'S NEXT MOVE

As the July consumer price inflation (CPI) print slid to eight-year lows, analysts were divided on if the Reserve Bank of India would continue easing the key benchmark lending rate. In the August meeting, the RBI's Monetary Policy Committee voted unanimously to keep the repo rate unchanged at 5.5 percent, instead waiting for the front-loaded rate cuts of 100 basis points over this cycle to transmit through the system. However, going forward some analysts expect the tactical pause to turn into some easing. With the global trade turmoil slowing a key risk to domestic growth, a large consensus expects the central bank to trim the rate by 25 basis points in the October meeting, with Nomura - the sole outlier - expecting another cut in the December meeting.
